Summary

Software Engineer at Edgestream Partners, L.P. in Princeton, NJ where I was hired to maintain and improve the company's large pre-existing codebase (Python and C/C++).

Education

- Rutgers University** New Brunswick, NJ
B.S. Computer Science w/ minor in Mathematics 2015 - 2019

Industry Experience

- Edgestream Partners, L.P.** Princeton, NJ
Software Engineer May 2019 - Current
 - Integrated pylint into a codebase with well over a million lines of existing code that has been accumulated by Edgestream over the last 20 years. As the lead on this project, I was responsible for building several non-trivial tools to aid in making this integration a success.
 - Lead developer of Edgestream's investor-facing web portal, which was built using Python's Django web framework.
 - Worked closely with the Accounting department, where my role was to automate many of the data-related (e.g. data entry/download/upload) tasks that previously had to be performed manually each day.
 - Made several large-scale improvements to the production department's in-house testing framework/runner, which greatly improved the team's testing practices.

Open Source (GitHub) Projects

- psf/black** Python
The uncompromising Python code formatter. November 2019 - March 2020
 - Improved the way black handles strings (<https://github.com/psf/black/pull/1132>).
 - Non-trivial contribution consisting of ~3,500 lines of code additions/modifications.
 - Led to the closing of five unrelated GitHub issues (opened by five different developers at different times).
- bbugyi200/cookie** Shell
A Template-based File Generator. 2018 - Current
 - Well received by the developer community (over 200 stars on GitHub).
 - Multiple outside contributions have been accepted (e.g. user submitted issues/bug reports and code contributions).

- **bbugyi200/funky** Python, Shell
2017 - Current
Makes shell functions easier to define, more flexible, and more interactive.
 - Well received by the developer community (over 300 stars on GitHub).
 - Multiple outside contributions have been accepted (e.g. user submitted issues/bug reports and code contributions).
- **GermainZ/weechat-vimode** Python
2017 - 2018
A WeeChat script that adds vi-like modes, commands and keybindings.
 - Made several non-trivial contributions to this project. My most significant contribution was a parser that I wrote which was used to replicate vim's `:nmap` command (~500 lines of code).

Skills

- **Languages:**

I have assigned each of the languages listed below a rank between 1-3 to indicate my level of proficiency with that language. A rank of 1 indicates that I have taken a college course that made use of the language and/or have read a book about the language. A rank of 2 indicates that I have also written over 5,000 lines of code in the language. And a rank of 3 indicates that I have also written over 30,000 lines of code in the language.

Programming Languages

- PYTHON: 3
- C/C++: 2
- PERL: 2
- RUST: 2
- SHELL: 2
- HASKELL: 1
- JAVA: 1
- JAVASCRIPT: 1
- MATLAB: 1

Markup / Domain-Specific Languages

(The rank requirements are relaxed a bit in this section.)

- L^AT_EX: 3
- SQL: 2
- AWK: 2
- VIMSCRIPT: 2
- HTML/CSS: 1

- **Technologies:** Django, Flask, Git, Linux, Twisted, Vim
